## **DETAILED ACTION**

### ***Status of the Claims***

Claims 18 and 19 are pending. Any objection or rejection not expressly repeated has been withdrawn. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Upon further consideration of the art of record, prosecution is hereby reopened, and the previously indicated allowability of claim 18 is withdrawn.

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

### ***Claim Rejections - 35 USC § 102***

Claims 18 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by NIPPON SYNTHETIC CHEM (JP 59-58026). Because this reference is in Japanese, the examiner is relying, in part, on the Derwent abstract of record to indicate its contents.

The reference teaches the addition of sulfite to 2-butene-1,4-diol and polyesters prepared from the product of this reaction. See Method 1 in abstract. Due to expected double bond migration, it appears that sulfonation and oligomerization of 2-butene-1,4-diol would result in the same set of products as those set forth in claim 18. The preparation of polyesters from this product would result in the product of claim 19.

Since the Office does not have the facilities for preparing the claimed materials and comparing them with prior art inventions, the burden is on Applicant to show a novel or

unobvious difference between the claimed product and the product of the prior art. See *In re Best*, 562 F.2d 1252, 195 USPQ 430 (CCPA 1977) and *In re Fitzgerald*, 619 F.2d 67, 205 USPQ 594 (CCPA 1980).
